

Hi, the prupose of this correspondence is to inform you how much I enjoy K-LOVE in my community. The positive message in this broadcast is necessary in todays society. It is nice to have a radio station that I can allow everyone in my family to listen to without concern. To have that taken away if it were replaced would be a great disppointment to me and many other in my family. I also beleive to have a station such as this helps me have a better attitude during the day which affects everyone I come into contact with, as is the case with all other listeners.
